Mission

BCOER is a group of B.C. Postsecondary librarians working together to support the use of quality Open Educational Resources (OER).

Created by Berkay Sargın
from the Noun Project

BCOER Hackfest

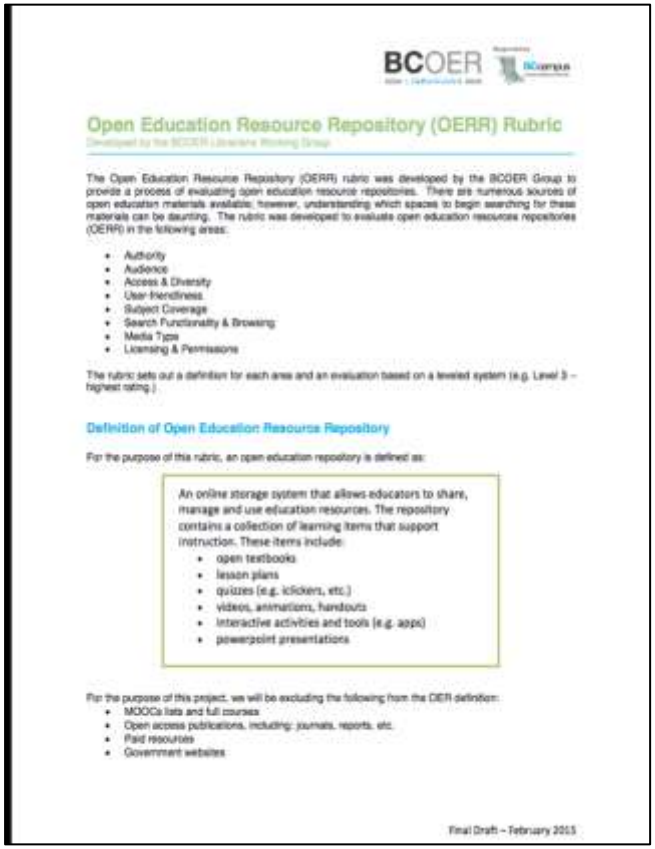
OER Awareness was identified as a key need. Talking points for an advocacy poster and ideas for librarian professional learning were discussed.

We tested an assessment rubric for OER repositories. 40 science repositories were evaluated.

BCOER Project: Advocacy Poster

A poster was develop with talking points to engage faculty in conversations. It is an OER made available on open.bccampus.ca

BCOER Project: OER Assessment Rubric



BCOER

Open Education Resource Repository (OERR) Rubric

Developed by the BCOER Librarians Working Group

The Open Education Resource Repository (OERR) rubric was developed by the BCOER Group to provide a process of evaluating open education resource repositories. There are numerous sources of open education materials available; however, understanding which spaces to begin searching for these materials can be daunting. The rubric was developed to evaluate open education resources repositories (OERR) in the following areas:

- Authority
- Audience
- Access & Diversity
- User-friendliness
- Subject Coverage
- Search Functionality & Browsing
- Media Type
- Licensing & Permissions

The rubric sets out a definition for each area and an evaluation based on a leveled system (e.g. Level 3 – highest rating.)

Definition of Open Education Resource Repository

For the purpose of this rubric, an open education repository is defined as:

> An online storage system that allows educators to share, manage and use education resources. The repository contains a collection of learning items that support instruction. These items include:
>
> - open textbooks
> - lesson plans
> - quizzes (e.g. iClickers, etc.)
> - videos, animations, handouts
> - interactive activities and tools (e.g. apps)
> - powerpoint presentations

For the purpose of this project, we will be excluding the following from the OER definition:

- MOOCs lists and full courses
- Open access publications, including: journals, reports, etc.
- Paid resources
- Government websites

Final Draft – February 2013

The OER Repository rubric developed and tested at the Hackfest is now available on open.bccampus.ca.

BCOER Project: Subject Guides

These OER Primer Libguides were developed by a team of BCOER librarians. The links are available on open.bccampus.ca

Upcoming Events

Open Education Week 2015

BCcampus Webinars
March 9 - 14

Open Textbook Summit
May 28 & 29

BCLIBRARY CONFERENCE
May 20 - 22

etug Educational Technology Users Group

Spring Workshop June 4 & 5

OPEN EDUCATION GLOBAL Conference · 2015

April 22 - 24

Future Projects

Currently exploring & testing a collaborative space to develop/maintain OER subject guides

More Project Ideas

- Develop more pro-d opportunities in variety of modes (e.g. f2f, webinar, podcast, self-serve resources)
- Host a resource sprint for/by librarians
- Facilitate an OER librarians community of practice
